Messung: 9. und 16. April 2026 / Bericht: 20. April 2026

Zusammenfassung

For template purposes, different kinds of text, tables and figures are present here.
Feel free to change anything. First of all, change the language to your liking.

1 Introduction

This report documents the experimental setup, measurements, and analysis results.

All source data are kept in the repository under `../Data/`, and plots/tables generated in notebooks are exported to `../Analysis/exports/` for direct inclusion in this document.

2 Method and Workflow

2.1 Data Organization

Raw inputs are stored in `../Data/raw/`. Cleaned or transformed inputs are stored in `../Data/processed/`.

2.2 Analysis Workflow

Jupyter notebooks in `../Analysis/` perform calculations and export figures/tables to `../Analysis/exports/`.

2.3 Documentation Workflow

This LaTeX project references local and exported assets via `\graphicspath`.

3 Examples

Here, you can find several example of typical elements I use in my reports.

3.1 Circuit Example

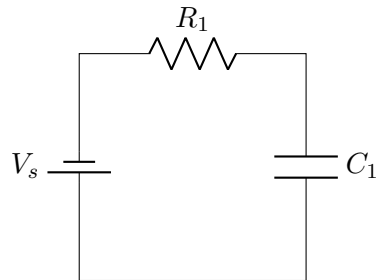

Abbildung 1: Some kind of circuit.

This line is referencing the circuit in figure ?? right above.

3.2 Figure Example

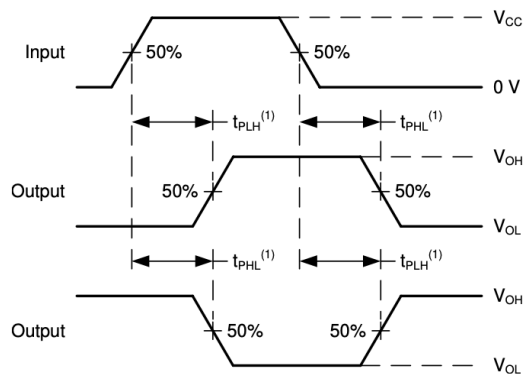

Abbildung 2: Definition der Verzögerungszeiten aus dem Datenblatt des IC [SNx4HC00]

In Abbildung ?? aus dem Datenblatt ist dargestellt wie die Verzögerungszeiten t_{pLH} und t_{pHL} definiert sind [SNx4HC00].

3.3 Table Example

This is how you can include a table:

t_{pLH} bei 2 V	t_{pHL} bei 2 V	t_r bei 2 V	t_f bei 2 V
258,6 ns	257,8 ns	17,2 ns	19,1 ns

Tabelle 1: Messwerte der Verzögerungszeit bei 2 V

This line is just to show quoting table ??.
